

DENTAL INSTRUMENTS CATALOGUE

Amerada International
Manufacturer & Exporter of Dental Instruments

OUR SCALERS CRAFTSMANSHIP

Amerada International

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision there Grooves for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 20 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. of course, any manufacturer can make these claims, but we guarantee and certify ours.

- High-polish mirror finish tips.
- Manufactured within the guidelines of the FDA quality assurance system for good manufacturing practices.
- Highest grade German stainless steel, razor sharp, durable tips. Rockwell hardened to 60 RHc.
- 27 of the most popular designs from graceys to McCalls to columbias, and many european patterns.
- All instruments are guaranteed against defects in material and workmanship.

- All instruments bear the ce mark, emblematic of the european community's highest standards.
- Customer satisfaction guarantee, too!
- Less than 20 grams ... Lightweight for less hand fatigue.
- Manufactured to the most exacting standards so the 50th instrument you buy is exactly like your first.
- You decide ... Why pay more for the same high-quality instruments?

We feel immense pleasure to present our latest catalogue in which we have featured a most comprehensive range of all types of quality Dental instruments required for day to day use for Dental Clinics. We will be pleased to quote you a competitive Price and Delivery time.

All instruments are manufactured according to the recognized standard patterns currently in use in Dental Clinics throughout the world and are being produced under restrict control of experts to avoid any flaw and to refrain any complaint at any stage.

A group of very vast experienced persons in manufacturing handling our quality Control System. Any instruments proven defective in workmanship or material will be replaced with out charges.

We express our thanks to all our customers for the confidence they have placed us in the past. We further assure them that we will continue our best efforts to gain their confidence in the future.

We are always at your service.

Bernard Root Elevators are particularly suitable for the excision of fractured roots or root fragments. They represent a combination of root tip elevators and luxating elevators. The inner side is concave and the laterals edges are for cutting. This allow for rotatory movements, and when applying slight pressure, the ligaments can be separated and the remaining root fragments can be loosened. This section includes a set of five Bernard Root Elevators, including Left, Right, Straight, Mesial & Distal form. All elevators are made from Surgical Stainless Steel Hollow handle, light weight Completely Sterilizable Bernard Root elevators also know as Syndesmotomes. They can also be use as Periotome or to elevate Small Roots

THERMO PLIERS & MATHIEU NEEDLE HOLDERS

Ai-939
Hole Punch Plier
Creates half-moon cutouts in clear aligners to allow space for bonded buttons used for elastics

Ai-940
Vertical Punch Plier
This versatile plier emphasizes on over-correction of rotations by creating an indentation at the mesial or distal line angles on the facial and/or lingual of a specific tooth. Can also be used to create a rotational couple using vertical indents on facial and lingual surfaces on opposite sides of a tooth.

Ai-941
Tear Drop Punch Plier
Designed to create a notch at the gingival margin of clear aligners anywhere elastic hooks are required within the arch, making sure the elastic stays in place once the aligner is seated.

Ai-942
Horizontal Punch Plier
Designed to produce an indentation to accent individual root torque. Can also be used to enhance retention of clear aligner or retainers by placing an indent into a tooth's undercut or below a bonded attachment.

Ai-943
Dimple Punch Plier
Creates a tiny rounded dimple for spot contacts to accent individual tooth movements or added aligner retention. Typically used to accent movement on any tooth that requires a slight "nudge"

Ai-944
Eraser Plier
The eraser plier is designed to remove and flatten any unwanted indentations placed on clear aligners by other punch pliers.

Ai-945
Groove thermal forming plier
Designed for making grooves on clear appliances, to hold the elastic, prevent it falling off

Ai-946 ● Yellow
Thermoplier
Micro-Ramp Pliers
Tip, torque or rotate smaller teeth laterally; Allow contact close to incisal edge
On the correct location on the target tooth

Ai-947 ● Pink
Thermoplier
Small Circle Pliers
Increase the size (depth) of small existing force point
Location of the existing force point
